GRID CONNECTED KIT 1200

The Kit 1200 is a completed grid connectet solar power system with 1200 Wp.

With a Grid Connected Solar Power System, clean solar power takes the place of grid power when the sun is shining, even to the point of selling a surplus back to grid. When the sun is not shining or when extra power is needed, electricity can be automatically purchased from the grid. Systems for residences, offices, stores or factories can be provided.

Approximate energy produced 1100 kWh per year

Price

Part 1:

- only components
- BHT approx: 380,000.00

Part 2:

- including components and installation / mounting and mounting system for modules
- briefing and initial startup of the solarsystem
- BHT approx: on request

Components

- 10 Solarmodules Sharp à 120 Wp
- 1 Sunny Boy SWR 1100E
(Made in Germany)
- optional: kWh-Meter

Every day the sun sends us sufficient energy to keep the total world population supplied with energy for years and years.
